Debbie Nelson & Associates Designs the New CDS Development Brochure

Greenville, SC (February 16, 2009) — Debbie Nelson & Associates (DNA) proudly supports the Center for Developmental Services (CDS) by recently creating the new development brochure as an in-kind donation. DNA conceptualized and designed an updated look for the brochure, which contains important information about CDS, as well as raises awareness of CDS's services and is a tool for fundraising.

CDS is a nonprofit collaboration of six Greenville County organizations that provides services for children with developmental challenges. Through this unique partnership, children with disabilities can receive their necessary medical treatments and educational services in a central location. CDS staffs trained professionals in a variety of disciplines in order to meet these children's particular developmental needs. For more information on CDS, please visit CDServices.org.
